

# FATTY LIVER RESEARCH

## Volunteers Needed

Director Dr. Mazen Nouredin

The specialists at the Cedars-Sinai Fatty Liver Program are committed to offering the most advanced diagnostic and treatment options possible to patients with:

- Non-alcoholic Fatty Liver Disease (NAFLD)
- Non-alcoholic Steatohepatitis (NASH)
- Cirrhosis

The Fatty Liver Research Team is looking for volunteers who have been diagnosed with NAFLD or NASH to be part of the Specimen Repository and Data Registry Study.

If you have been diagnosed with fatty liver and you do not drink significant amount of alcohol, you may be eligible for a free Magnetic Resonance Elastography (MRE) or Fibroscan to assess if you have any scarring in your liver through this study. The time commitment for this study is no more than 2 hours and consists of blood draw, questionnaires and imaging if you decide to do the Fibroscan and/or MRE. Compensation of \$50 will be given to those who undergo an MRE.
