WANT TO HELP US LEARN MORE ABOUT THE QUALITY OF LIFE OF MEN WITH KLINEFELTER SYNDROME?

RESEARCH OPPORTUNITY: WE INVITE YOU TO PARTICIPATE!

STUDY: Impact Of Therapies And Supports On The Quality Of Life Of Men With Klinefelter Syndrome

WHO: Men with Klinefelter syndrome who are 18 years or older

TIME: The survey should take about 15 minutes to complete.

BENEFITS: Participants will receive a $10 Amazon gift card for completing the survey and help researchers to better understand how living with Klinefelter syndrome affects quality of life.

GOAL: The purpose of our study is to learn more about how access to interventions such as therapy, support groups, and school services impacts the quality of life of men with Klinefelter syndrome. We hope to use the information gained from this study to improve the available treatments for Klinefelter syndrome.
